Chapter One

Welcome from Johns Island

We treat kratom, opioid, alcohol and other substance use for adults from Johns Island at our West Ashley office.

Chapter Two

Kratom can bring withdrawal

People may have mild to moderate withdrawal when they stop regular kratom use, so a plan helps.

Chapter Three

Options after an evaluation

Care starts with a medical evaluation. A supervised taper is one option, and some people need more support.

Chapter Four

Bring the label

Keep the package or a photo of the label for your provider, because product strength varies.

Chapter Five

Fewer long drives

Plan for the longer trip when a visit is in person. Many other visits can be by secure video.

Epilogue

Stopping is easier with a plan.

Daily kratom use can be hard to stop on your own. A first visit is a conversation about what you use and what you want next.
