Contents

1 Welcome from Ladson 3

2 A shot instead of a daily dose 4

3 Given at the office 5

4 Weekly or monthly 6

5 Still no alcohol 7

Chapter One

Welcome from Ladson

We treat opioid, alcohol, kratom and other substance use for adults from every part of Ladson at our West Ashley office.

Chapter Two

A shot instead of a daily dose

For opioid use disorder, a weekly or monthly treatment shot can mean no daily dose to remember.

Chapter Three

Given at the office

Long-acting shots are given only in our office, never at home, because injecting one into a vein is dangerous.

Chapter Four

Weekly or monthly

Your provider helps you choose a weekly or a monthly shot based on where you are in treatment.

Chapter Five

Still no alcohol

Any form of this treatment can be dangerous with alcohol or sedatives, so skip both.

Epilogue

Treatment that fits your shifts.

A daily dose is easy to miss on a long shift. A first visit is a chance to ask whether a weekly or monthly shot fits your life.
