Table of

Contents

1 Care without the miles 3

2 Help for a shortage area 4

3 A careful first visit 5

4 Testing from home 6

5 Treatment that helps 7

Chapter One

Care without the miles

Barnwell adults can be seen by secure video, so a long drive does not stand between you and answers.

Chapter Two

Help for a shortage area

Barnwell County has too few mental health professionals. A video visit means you do not wait for a local opening.

Chapter Three

A careful first visit

Your provider reviews your symptoms, your history back to childhood and conditions that can look like ADHD.

Chapter Four

Testing from home

If you have never had a formal evaluation, testing comes before treatment. It is self-pay and done on your own computer.

Chapter Five

Treatment that helps

NIMH says treatment can reduce symptoms. Your plan is decided with you, and counseling and follow-up visits can happen by video.

Epilogue

Answers can start at home.

Living far from services should not mean living with unanswered questions about focus. A video evaluation is a practical first step.

Ready to write your next chapter?

Start an ADHD evaluation by video from Barnwell.
